What Is the Greenway?

The Brooklyn Waterfront Greenway is a planned 27-mile greenway along New York City’s waterfront that will connect all five boroughs. It will begin near the beginning of the Shore Parkway in Brooklyn and extend out to the Queens East River bridges.

Why Build the Greenway?

Increase Mobility

Greenways are a key transportation mode for commuters and walkers to connect communities.

Improve Public Health

Greenways offer healthful opportunities and green spaces.

Green Streets & Sidewalks

Green streets and sidewalks increase the amount of green space and connect communities.

Improve Water Quality

Greenways provide stormwater management and improve city water quality.

Provide all New Yorkers with access to greenways and green spaces.

What Will the Greenway Look Like?

The Greenway will be a network of pathways, green spaces, and parks along the waterfront.

How Will It Happen?

The Greenway is happening because of a focused plan, a BGI member or volunteer!

Since 2004, BGI has been working on the Implementation Plan.

In 2008, NYC DOT began to plan the GreenwayRoute and work to make sure that the Greenway route and associated capital projects are connected.

Projects along the Greenway.

These NYC capital projects -- and additional money for both short-term and long-term greenway improvements -- will be implemented over time and will be shared by these landowners and stakeholders.

In addition to sections on projects along the Greenway, there will be a BGI member or volunteer!

To find out more about the Greenway, please contact BGI. You can visit our website, brooklynwaterfrontgreenway.org, to view the Implementation Plan, or contact us at 718-386-9863.
